### DESCRIPTION

Thank you for your recent enquiry for a sewage system compliance/condition check.

You have advised that you require a level 3 survey which includes:

- Carrying out an assessment of your current tank and discharge to advise if the system is compliant including x2 hours onsite
- Report on compliance of your system
- Report on condition of your system
- Remedial options and costs if required
- Assess with CCTV equipment where possible the outlet of the tank to determine the condition of any drainfield
- Dye test where possible using water/hose onsite to assess where surface/rainwater is draining (ground level access only)
- Provide guidance on building regs and general binding rules
- Two wastewater engineers
- Confined space equipment
- Up to two hours onsite

Please note that the results may be inconclusive depending on the normal working levels within the tank, access to the outlet and access to the downpipes.

If you have had any issues in the past with your unit, we would recommend that you have a desludge of the system at the time of our visit as a minimum. The level 3 survey does not include a desludge, you have the option to use your own desludge company.

Please speak to us if you are not sure what level of survey is required.

## QUOTE DETAILS

Description	Part	Qty	Unit	Tax %	Line Total
No items found.					

<b>Subtotal</b>	895.00
<b>Tax</b>	179.00
<b>Total</b>	1074.00
